PROFESSIONAL SUMMARY

Generative AI & Agentic AI Engineer with 3 years of experience designing, testing, and deploying secure, scalable, **production-grade** LLM and agentic AI workflows for 10+ enterprise clients. Proven expertise building autonomous agents and multi-agent systems, enhancing reliability via advanced logging, safety checks, and real-time feedback loops: **100% LLM safety compliance**, **35% faster incident resolution**, and **75% reduction** in sensitive data exposure across all deployments. Skilled in LLM orchestration, tool use, multi-agent architecture, AI governance, and enterprise observability — from pilot validation to full production rollout.

TECHNICAL SKILLS

Agentic AI & Orchestration: LangChain, LangGraph, MCP, ReAct, Multi-agent Workflows, Tool Use & Function Calling, Agent Memory, Agent Evaluation

GenAI, RAG & Governance: RAG Pipelines, Retrieval Strategies, Embeddings, Semantic Search, Prompt Engineering (CoT, few-shot, role prompting), Hallucination Mitigation, Guardrails (Prompt Guard, Llama Guard), AI Policy & Governance, Human-in-the-Loop ML

LLM Providers & Vector DBs: OpenAI API, Anthropic API (Claude), ChromaDB, Elasticsearch

Backend & APIs: Python (async), FastAPI, Flask, REST APIs, Postman API, SQL, JavaScript (React)

Cloud & DevOps: Azure, Azure DevOps, Docker, CI/CD, Git, GitHub, Power Automate, Postman, GLPI, Incident Management, Multi Tenancy Architecture Integration

PROFESSIONAL EXPERIENCE

Kyndryl India

Associate Technical Engineer — Data & AI

Jul 2023 – Present

Delhi NCR, India

- Shipped autonomous AI agents — Q&A bots, incident triage agents, remediation workflow agents, and SSL certificate automation agents — to **production** for 10+ enterprise clients (Bangalore International Airport, Honda, Tata Steel, Bajaj Finance, AmEx), eliminating manual IT intervention across high-volume operational workflows.
- Engineered multi-agent orchestration pipelines in LangGraph using ReAct reasoning, enabling agents to decompose complex tasks, invoke external tools via tool use, and self-correct autonomously across live enterprise knowledge bases with **zero critical production incidents**.
- Standardised tool use and context integration across **15+ production agent workflows** using MCP-driven orchestration, exposing autonomous agent capabilities as structured function calling APIs on Azure OpenAI — cutting integration overhead by **40%**.
- Designed and optimised production RAG pipelines with ChromaDB across 10+ client deployments, applying chunking, indexing, and embedding strategies that reduced average query latency by **35%** and improved response grounding and hallucination scores.
- Built centralised agent evaluation frameworks with real-time monitoring and structured logging, cutting mean-time-to-resolve by **35%** and enabling full production observability across all deployed autonomous agents.
- Achieved **100% LLM safety compliance** and reduced sensitive data exposure by **75%** by embedding Prompt Guard and Llama Guard guardrails with enterprise-grade DLP policies across all client environments.
- Authored internal agentic AI development and production-readiness standards, standardising multi-agent system architecture patterns (planner/executor, tool-use, multi-step reasoning) — onboarded **8+ engineers** and reduced project ramp-up time by **30%**.

Birja Constructions LLP

Website Developer Intern

May 2022 – Jul 2022

New Delhi, India

- Sole developer on a 5-person cross-functional team; designed, built, and shipped a full-stack blog platform to **production**, reaching **20,000 viewers** within its first month of launch.

PROJECTS

Pneuid — CNN-Based Pneumonia & COVID-19 Detection

- Trained and deployed a convolutional neural network on labelled chest X-ray imagery to automate COVID-19 vs. pneumonia classification, delivering a functional medical image diagnosis support tool. Stack: Python, TensorFlow.

CERTIFICATIONS

- Certified Agentic AI Engineer (CAAE)** — REVA Academy for Corporate Excellence (RACE), REVA University, Completed May 2026. 72+ hours of specialised training covering Agentic AI, LLMs, Model Architectures, Prompt Engineering, and Enterprise AI Applications.
- Microsoft Certified: Azure Fundamentals (AZ-900)** — Issued Jan 2024

EDUCATION

Amity School of Engineering & Technology, Noida, UP

B.Tech, Computer Science & Engineering; Grade: 7.82 CGPA

2019 – 2023

St. Michael's Senior Secondary School, New Delhi

Senior School Degree, PCM with Computer Science; Grade: 81.4%

2017 – 2019
